4	10.15: consultation time	10.15- midterm presentation (ppt or pdf)
5	10.15: consultation time	10.15 consultation
6	10.15: consultation time	10.15 students present their development
7	10.15: consultation time	10.15- Presentation of final projects

Program

An architectural intervention with a functional program of your choice. The uncomfortable, dirty and improper situation has several hidden values, that the students should reveal and use. The proposed intervention should consider the architectural and cultural history of the surrounding area, the bridge and the church. "Under economical pressure", you have to build up a simplified business model for the new function and calculate the future viability of your project.

Student presentations:

- week 1: PowerPoint or pdf slideshow, 2-5 minutes per group on different topics related to site
- week 2: PowerPoint or pdf slideshow, 5-10 minutes, showing your functional program, motivating references, and your first sketches
- week 3: physical model of site with 2-4 minutes of oral presentation of your concept.
- week 4 midterm presentation, slide show in 10-15 minutes including some references (not too many) - site plan -3Dviews - floorplans, sections, elevations detailed in a level corresponding to 1:200 scale – sketches, floor plans, sections or 3D views explaining the concept
- week 6: oral presentation in 2-3 minutes showing to others how your project changed and developed.
- week 7: -week 4 final presentation, slide show in 10-15 minutes including – physical model - site plan -3Dviews - floorplans, sections, elevations detailed in a level corresponding to 1:100 scale – sketches, floor plans, sections and 3D views explaining the concept in a level corresponding to 1:100 or 1:200 scale as chosen by teachers.
